

ORGANIC YEAST EXTRACTS

LOW SODIUM AND GLUTEN FREE

WHY ORGANICS?

Organic or Bio means an approach to a chemical-free nutrition, healthy sustainable ecosystem, and a conscious wellness, all of which are embodied in safety.

To ensure this status, the agricultural and packaged products must adhere to different countries' regulations and obtain a certification, represented in seals that identified its organic/bio condition.

WHY OUR ORGANIC/BIO SOLUTIONS ARE THE ALLY YOU NEED?

Taste Improvement notes present in formulation. Unlike other ingredients in the market, Biolev's organic solutions have cleaner profiles, are gluten-free and certified Non-GMO. This is the result of carefully controlled fermentation and enzymatic processes, and the quality of the certified organic raw materials used in their production.

Our own pure cultures of *Saccharomyces cerevisiae* develop special sensory characteristics that are able to mask undesirable flavor notes such as bitterness due to cereal sources, artificial and fatty, while improving flavor notes such as roast, sweet, spice, umami and meaty (beef and white meat) by, rounding them up and making them more savory and mouthwatering.

Due to their nature, these natural biotechnological ingredients are rich in protein, free amino acids, B complex vitamins, and minerals, making them an organic nutritional source.
